

PETITION

To: The Parliament of Ontario

Please take appropriate action to ensure that the development of a power generation project at Big Eddy (Site 2KB21) is stopped. I object to this development because:

- 1. The project would have a severe impact migration of fish, including some species at risk, between the Ottawa River and Algonquin Park;**
- 2. The project would destroy one of the premier urban kayaking locations in North America;**
- 3. The project represents a public safety hazard to users of the park area a few hundred metres downstream of the powerhouse;**
- 4. The project would have a major negative aesthetic impact on a stretch of the river right in the middle of the town of Petawawa;**
- 5. The Petawawa River is the only significant free-flowing tributary of the Ottawa River in Ontario; and**
- 6. The proponent of this project is not fulfilling his obligation under the Class Environmental Assessment process to ensure open and transparent public communication, and to ensure that public concerns are reflected in the design of the project.**
